ABSTRACT

The U.S. Department of Education Center for Statistics annually collects data through its Survey of Institutional Characteristics of Colleges and Unversities as part of the Higher Education General Information Survey (HEGIS) program. This survey establishes the universe of institutions for all surveys in HEGIS and provides a common base for coding, trend analysis, and cross-survey data studies. A classification of higher education institutions is provided. Seven tables provide data on: the number of institutions of higher education in the HEGIS universe with additions and deletions, by control and type; institutions of higher education, by control and type (old classification); institutions of higher education, by control and type (new classification); institutions of higher education, by type and state; public institutions of higher education, by type and state; private institutions of higher education, by type and state; institutions of higher education accredited by individual accrediting agencies, by control and type; and institutions of higher education accredited by individual accrediting agencies, by control and type. All statistics include the 50 states and the the District of Columbia. In the 1984-85 school year, 3,331 higher education institutions and their branches had accreditation, an increase of 47 institutions over the previous year. Since 1977-78, the number of schools in HEGIS has shown a net increase of 236 schools. (SM)

Accredited Higher Education Institutions in 1984-85

In the 1984-85 school year, 3,331 higher education institutions and their branches in the 50 States and District of Columbia had accreditation, an increase of 47 institutions over the previous year. The increase came from 18 public 2-year schools, 17 private 2-year schools, and 12 private 4-year schools added to the Higher Education General Information Survey (HEGIS) universe for the 1984-85 survey year (table 1). Since 1977-78, the number of schools in HEGIS has shown a net increase of 236 schools, or 7.6 percent. The number of private schools increased more than public schools by a ratio of 8 to 1. In 1984-85, 55 percent of accredited institutions were private, although they accounted for only 22 percent of the 1983-84 enrollment,[1] and 36 percent of the 1982-83 conferred degrees[2] (the latest survey data available).

The Center for Statistics annually collects data through its Survey of Institutional Characteristics of Colleges and Universities as part of the HEGIS program. The 1984-85 survey was the 19th in the series. This survey establishes the universe of institutions for all surveys in HEGIS and provides a common base for coding, trend analysis, and cross-survey data studies. The Eligibility and Agency Evaluation Staff, U.S. Department of Education, determines which institutions are included in the survey.

Growth in the number of higher education institutions and their branches participating in the HEGIS program in the past 8 years is shown in tables 2 and 3. For comparison purposes, table 2 uses the old HEGIS classification and table 3 uses the new. Both tables present trend data from 1977-78 to 1984-85. Tables 4, 5, 6, and 7 use the new HEGIS classification, described on page 2.

A list of the institutions added and deleted from HEGIS in the 1984-85 survey year is available on request. For the list, or for more information on this report, call or write Rosa Fernandez, Center for Statistics, 555 New Jersey Avenue NW., Washington, D.C. 20208, telephone (202) 626-9008.

Higher Education General Information Survey (HEGIS)
Classification of Higher Education Institutions

New classification started in 1983-84 for the Survey of Institutional Characteristics.

1. Doctoral-level – Institutions not considered specialized schools and grant a minimum of 30 doctoral-level degrees.

2. Comprehensive – Institutions not considered specialized schools, and grant less than 30 doctoral-level degrees, or offer fewer than 3 doctoral level programs.

3. General baccalaureate – Institutions not considered specialized schools, and grant less than 30 post baccalaureate degrees, or offer fewer than 3 post-baccalaureate programs.

4. Specialized – Baccalaureate or post-baccalaureate institutions with a programmatic emphasis in one area, usually a professional field. Institutions granting over 50 percent of their degrees in fewer than 5 baccalaureate programs.

5. 2-year – Institutions that confer fewer than 25 percent of their degrees at the baccalaureate or post-baccalaureate level, and confer 75 percent of their degrees or awards for two years of work, or require less than two years of work for formal awards and completions.

6. New institutions (to the HEGIS universe) – Schools remain in this category until they file two years of earned degree data and classification can be determined based on the number of degrees awarded and the number of programs in which degrees were awarded.

Table 1.--Number of institutions of higher education in the HEGIS universe with additions and deletions, by control and type: 50 States and D.C., 1984-85

Type and control of institution	1984-85 Institutions	Net change from 1983-84[1]	Additions to the universe		Deletions to the universe	
			New to the universe[2]	Institution separations[3]	No longer in universe[4]	Institution merger[5]
Total	3,331	47	68	1	20	2
University	115	0	0	0	0	0
Other 4-year	1,910	12	31	0	17	2
2-year	1,306	35	37	1	3	0
Public, total	1,500	19	20	0	1	0
University	69	0	0	0	0	0
Other 4-year	497	1	0	0	1	0
2-year	934	18	20	0	0	0
Private, total	1,831	28	48	1	19	2
University	46	0	0	0	0	0
Other 4-year	1,413	11	23	0	16	2
2-year	372	17	25	1	3	0

1 Includes additions, deletions and changes to the type of institution for schools already in the universe. For example, a 2-year school now authorized to grant a 4-year award.

2 Institutions new to the HEGIS universe for 1984-85.

3 Additions to the universe because institutions separated from the parent institution and met the criteria for being listed as a separate institution.

4 Institutions that closed or are no longer considered eligible by Eligibility and Agency Evaluation Staff.

5 Deletions to the universe because institutions merged.
